**Box No. V** Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Novelty (N)	Claims	1-10	YES
	Claims		NO
Inventive step (IS)	Claims	1-10	YES

Industrial applicability (IA)	Claims	1-10	YES

## 2. Citations and explanations (Rule 70.7)

This report makes reference to the following documents:

D1: US 4 658 665 A (SEIDL ALFRED ET AL)  
21 April 1987 (1987-04-21)

D2: EP 0 024 697 A (SIGMA BAUELEMENTE GMBH)  
11 March 1981 (1981-03-11)

- 1 D1, which is considered to represent the closest prior art, discloses (the references in parentheses are to this document):

a circulating lubricant system for a train of gears with at least two gear stages (2) which are arranged adjacent to each other and operatively connected and a circulating lubricant system (9) comprising at least one filter unit (8)

from which the subject matter of independent claim 1 differs in that

lubricant circulating in the circulating

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;  
citations and explanations supporting such statement

lubricant system is drawn off and  
decontaminated by the filter unit before being  
fed to the other gear stage.

In virtue of these differences, the subject matter  
of the first and sole independent claim is novel.

Compared with the train of gears described in D1,  
the location of the filter unit and the second  
gear stage in the circulating lubricant system  
requires substantial modification of the overall  
train of gears. This could be achieved, even by a  
person skilled in the art, only after substantial  
effort and the subject matter of claim 1 is  
therefore not only novel, but also involves an  
inventive step.
